

Commercial Fitness Solutions Awarded Floor Plan Design, Equipment Supply, and Installation of the Creekside at Highlands Ranch

The local Colorado company, Commercial Fitness Solutions, was carefully chosen to provide the new floor plan design, strength equipment supply, and installation of the Greystar Property, Creekside at Highlands Ranch. Commercial Fitness Solutions provided comprehensive design and consulting services to create a fresh take on the clubhouse's existing fitness room. Fitness Consultant Katie Burney says, "I love it when I'm presented with an outside of the box challenge. In this case, Creekside was willing to take our suggestion of removing an existing window to create a TRX functional training area." The goal of redesigning the room was to open up the space, make the equipment more functional, and become a selling tool for competing with the expanding local area.

Before Renovation

The management team at Creekside determined that CFS was the best fit for the job based on the redesign of the room, presentation of information, and quality of equipment available. Cybex creates and manufactures premium quality exercise equipment that is designed to deliver unparalleled results for first-time users to professional athletes. Creekside at Highlands Ranch delivers new equipment to their residents that is more versatile and user-friendly, and it allows users to train with confidence in machine-defined movements or progress to more advanced user-defined movements. Simple touches such as reworking the cardio in the room to create a safer flow, a clear line to the televisions, and adding audio receivers to each piece really helped to make the workout environment more inviting. Creekside also invested in more dynamic changes such as removing an interior window to provide TRX functional training for residents to enjoy.

A Smiling Resident Uses the new Cybex Functional Trainer

About the Creekside at Highlands Ranch: This luxury apartment home complex is nestled between the breathtaking view of the Colorado countryside and the hustle and bustle of downtown Denver. With easy access to work or play, this Highlands Ranch located property provides residents with resort-style amenities, designer in home features, and style. Residents can enjoy relaxing by the sparkling pool, unwinding in the oversized spa, or working up a sweat in the newly update fitness center. Soon to come will be a dog wash station and bicycle aid station to add to the luxury lifestyle provided by Greystar.

Cardio Remix
